

# Hoteza Mobile Check-In: Features & Benefits

## Certified integration with PMS

Full and seamless integration with the hotel management system enables the hotel to optimize their operations. All data provided by guests will automatically go into the management system. Integration helps saving time for the guests, and ensures the highest level of service by giving staff more time to focus on guests, rather the check-in process.

## Integration with HRS Passport Manager

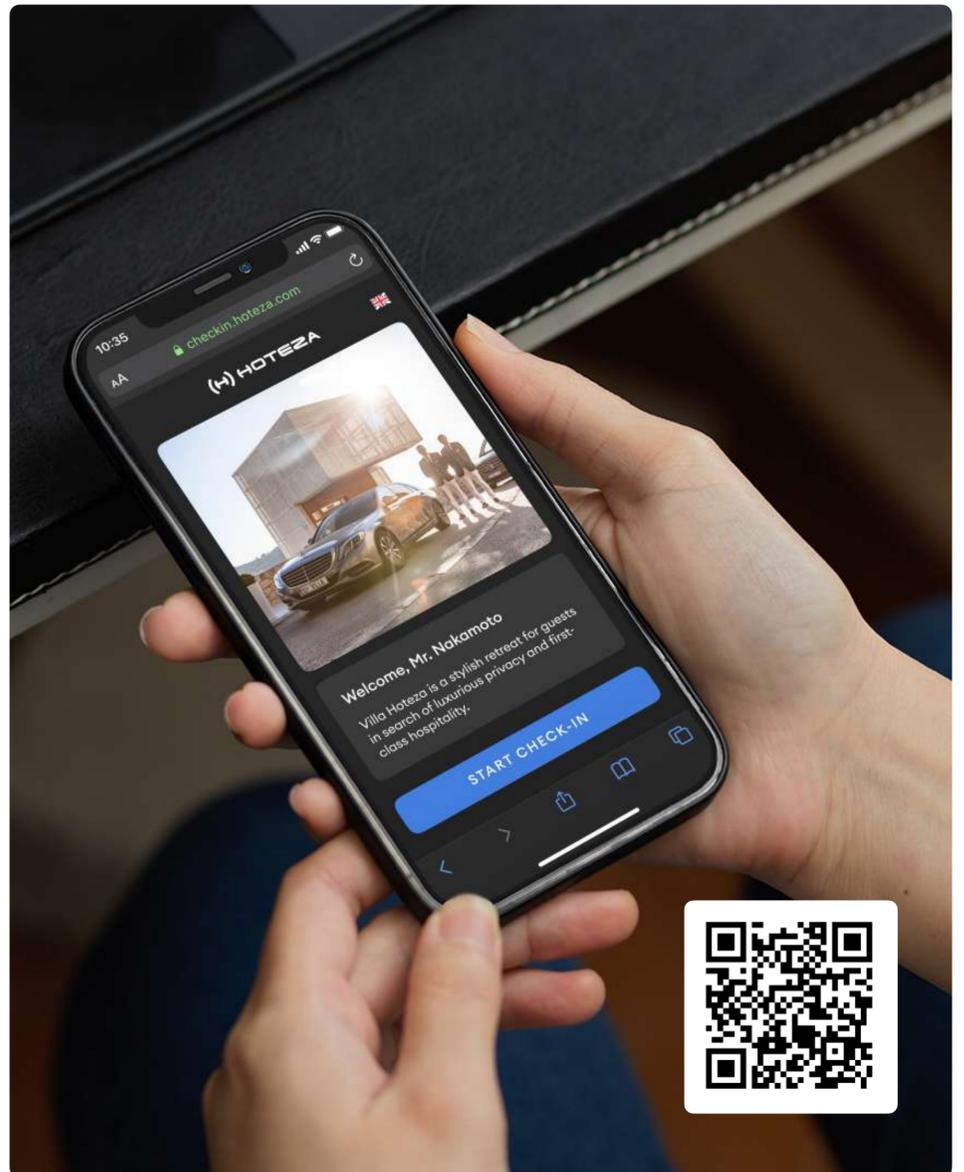

The integration will allow the hotel to process guests' passport data in advance and integrate the data transfer process into the electronic data exchange system with any tourist-related law-regulated software.

## Online payments that issues an electronic fiscal check

The self check-in allows the guests to pay immediately, using any payment card. It allows the hotel to hold the deposits and proceed recurring payments, save time and money on printing checks and avoid payments dispute.

## Collection and processing of direct guest contacts

During the online check-in process, the hotel receives the guest's email and phone number, which will allow the hotel to use this data for advertising and marketing purposes (with the guests' permission).

## Digital guest registration card

Allows the hotel to reduce operating expense for printing materials and makes filling process smooth and easy for the guests.

## Upsales & upgrades

Increase hotel revenue by upselling additional services and experiences prior to the guests' arrival, as well as upgrading the room category during the guests' online check-in process.

## Branding & Customization

Customize online check-in within hotel's corporate style (logo, font, colors, etc.) Keep the visual communication with the guest.
